DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-6 and 17-30 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1, the prior art of record does not teach nor suggest, in the claimed combination, a self-sustaining center-anchor microelectromechanical switch with an input transmission line separated by a predetermined gap from an output transmission line, ground lines at both sides of the transmission lines, anchors having a self-sustaining center-anchor formed on a center line of the transmission lines, to support a dielectric moving plate, located in the predetermined gap between the input transmission line and the output transmission line.

Claim 17, the prior art of record does not teach nor suggest, in the claimed combination, a self-sustaining center-anchor microelectromechanical switch with an input transmission line separated by a predetermined gap from an output transmission line, ground lines at both sides of the transmission lines, anchors having a self-sustaining center-anchor formed on a center line of the transmission lines to support a dielectric moving plate, wherein the anchors comprise edge-anchors and electrode anchors.

Claim 22, the prior art of record does not teach nor suggest, in the claimed combination, a self-sustaining center-anchor microelectromechanical switch with an input transmission line separated by a predetermined gap from an output transmission line, ground lines at both sides of the transmission lines, anchors having a self-

sustaining center-anchor formed on a center line of the transmission lines to support a dielectric moving plate, wherein the self-sustaining center-anchor and the dielectric-moving plate have a rectangular pattern connecting portions for connecting with each other.

Claim 26, the prior art of record does not teach nor suggest, in the claimed combination, a self-sustaining center-anchor microelectromechanical switch with an input transmission line separated by a predetermined gap from an output transmission line, ground lines at both sides of the transmission lines, anchors having a self-sustaining center-anchor formed on a center line of the transmission lines to support a dielectric moving plate, wherein the self-sustaining center-anchor and the dielectric-moving plate have a checked pattern connecting portions for connecting with each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
